

Who we are

SERVIZIO VOLONTARIO INTERNAZIONALE (S.V.I)

In 1999 S.V.I. supported Rwandan and Burundian refugees settled in Meheba Camp. Starting from 2006 S.V.I. is implementing in Mumena and Matebo Chiefdoms development

projects based on bottom-up approach according with local community objectives, integrated and oriented to face their challenges. Sustainability is based on local human and material resources with adoption of methods/technologies easily replicable by people involved, creating a network of local resources. A team of local workers trained is daily involved on "Agroforest3" project for sustainable agriculture techniques, in Solwezi and Kalumbila District.

IN & OUT OF THE GHETTO

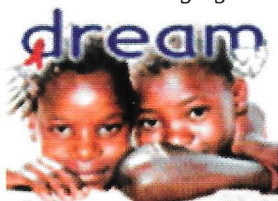

Fully incorporated into Bauleni compound, it has the goal to empower youth and the community to make sure they are active participants of development of their own environment and lifestyle. In & out of the ghetto means inside the compound where people live, to touch the daily reality, and out, to be able

to draw a path to go out from that situation through human growth, lifestyle improvement and overcome obstacles. Persons' dignity and respect for their job is a foundation of equal value for humanity and the income generating activity "LA BOTTEGA" is the answer to this.

COMMUNITY SAINT EGIDIO

Present and very active in many countries worldwide, the Community is committed to support the most vulnerable and sick people. In Zambia is still a small congregation which provides Christmas Lunch with the poor around different communities, the elderly and children. We carry on the "DREAM" project in Malawi.

LET'S MOVE TOGETHER

Contact us, we are very happy to meet and share with you our values and commitment for development
